The Apple Tree

The apple tree takes 4-5 years to develop into a mature tree, the fruit is in the tree but doesn't show until mature

There are 4 stages of Apple Tree maturing that relate to the 4 Seasons of Sistarhood

Preparation = *SpringTime Sistar* = *the time in life where you are preparing for who you will become.*

Evaulation = *SummerTime Sistar* = *The time in life where you are evulating your place in life*

Submission = *Harvest Time Sistar* = *The time in life where you have matured and start to become that which you have planted.*

Roll-out= *Winter Time Sistar* = *The time in life where you pour out and build on your Titus 2 becoming.*

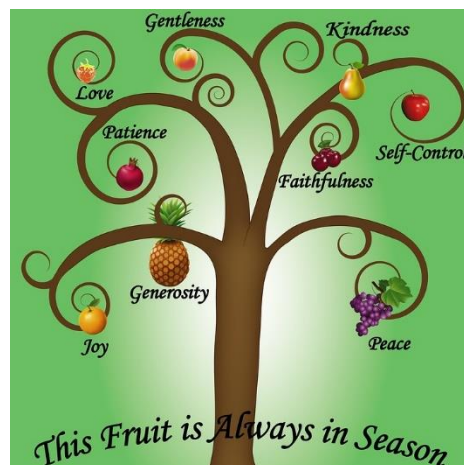

Every season you must lay aside those things you no longer need so that you can grow and prouduce for God and his Kingdom. Sometimes you will have to be pruned;you may not always like it but it is necessary! Stay on the alter of God willing so that you can prove that which is acceptable to God. This is a daily process. Allow God to use you. An apple tree does not eat of itself.
